

FOR IMMEDIATE RELEASE

VMAC LAUNCHES UNDERHOOD AIR COMPRESSOR MOUNTING KITS FOR 2017 MODEL YEAR TRUCKS AND VANS

NANAIMO, BC - DECEMBER 13, 2016 - VMAC announced it has completed development of all UNDERHOOD 30, 70, 150 CFM and Direct Transmission Mount (DTM) 70 CFM air compressor mounting kits for 2017 model year trucks and vans.

"We are very pleased to announce that all VMAC UNDERHOOD air compressor systems and DTM 70 CFM air compressor systems for 2017 model year vehicles are ready for production and will be shipping in January" says Mike Pettigrew, VMAC's Marketing Manager. VMAC has been working diligently with the major truck and van manufacturers since June to ensure all its systems were re-designed to meet the new model truck year design changes. "It was an unprecedented year for the number of systems that required re-design but we're pleased that shipments will be going out shortly", Pettigrew continued.

VMAC UNDERHOOD and DTM air compressors are the best choice for customers who need to save cargo space, reduce vehicle GVW, minimize maintenance requirements and improve safety. Available models come in a variety of outputs and include a variety of features:

- VMAC UNDERHOOD 30 CFM - Van Series Air Compressors
- VMAC UNDERHOOD 30 CFM - Truck Series Air Compressors
- VMAC UNDERHOOD 70 CFM Air Compressors
- VMAC UNDERHOOD 70 CFM - Green Series Air Compressors
- VMAC UNDERHOOD 150 CFM Air Compressors
- VMAC DTM 70 CFM PTO Driven Air Compressors

VMAC truck engine and transmission driven air compressor systems are engineered to be compact and powerful. There is no secondary engine to carry, service or fill with fuel. This translates into vehicle weight reduction, savings in maintenance costs and improved safety for operators.

VMAC engineers truck and van mounting kits for the easiest possible installation. Working closely with leading truck and van manufacturers, VMAC ensures that mounting kits do not affect OEM warranties. Mounting kits are custom-engineered for specific vehicle makes, models, engines, and model years.

Mounting kits are available for the most popular 2017 model year work trucks and vans:

- Ford Gas/Diesel Super Duty Trucks and Vans
- RAM Gas/Diesel Trucks and Vans
- GMC/Chevy Trucks and Vans
- Mercedes-Benz/Freightliner Sprinter Vans
- And more.
